

PERMANENT MARKERS

REACTIVE SPRING TECHNOLOGY INSIDE

Built into every Impact Traffic marker is our patented, anti-twist reactive spring assembly. This unique compression spring allows our markers to sustain vehicle impacts from any direction and return to its original, upright position time and time again.

HAZARD, SERGEANT & CHEVRON MARKERS

Hazard, sergeant stripe, and chevron stripe markers are ideal for warning drivers of hazards on the road that may not be readily apparent to them. Used individually or in groups, these permanent markers have multiple uses including: placement on island and gore areas, channelizing traffic, and delineating sharp changes and obstructions in roads.

PRODUCT FEATURES

- **Yields fully on impact**
 - **Provides high target value**
 - **Resistant to Damage** from ultraviolet light, ozone and hydrocarbons
 - **Superior Retro-Reflectivity** Type IV high intensity sheeting
- included in three pattern types
 - **Anti-twist reactive spring assembly that rebounds panel to its original upright, forward facing position when struck**
 - **MUTCD specifications**
 - **Federal Acceptance: WZ-2A**

TYPE "K" OBJECT MARKERS

PRODUCT SPECIFICATIONS

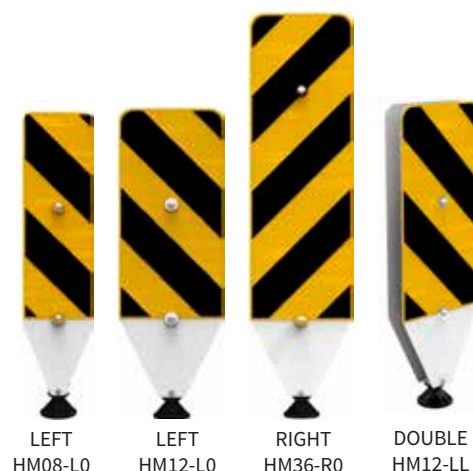

HAZARD MARKERS

Highly visible markers help alert motorists of roadway obstructions or sudden change in road alignment.

Product Specifications			
Dimensions	8" x 24"	12" x 24"	12" x 36"
Post	28" white HDPE flexible sign post with cap - 2.375" outer diameter		
Panel Material	White polyethylene plastic		
Reflective Sheeting	High intensity, type IV reflective sheeting with 4" black stripes pattern - <i>diamond grade also available</i>		
Spring Type	Fixed or Drivable spring types available*		
Compatible Bases	Surface Mount Fixed or Drivable bases*		
Directional Panel	Left or Right		

*Base and base mounting hardware is sold separately. Post spring type must be specified at time of order.

SERGEANT STRIPE PANELS

Ideal for island and gore areas, and in front of end treatments and other hazards. Can also be used for channelizing traffic into and out of toll plazas. Provides maximum target value.

Product Specifications		
Dimensions	12" x 36" overall	18" x 36" overall
Post	White HDPE plastic sign post - 2.375" outer diameter	
Panel Material	White polyethylene plastic	
Reflective Sheeting	High intensity, type IV reflective sheeting with black ink - <i>diamond grade also available</i>	
Spring Type	Fixed or Drivable spring types available*	
Compatible Bases	Surface Mount Fixed or Drivable bases*	
Directional Panel	6" Sergeant Stripes	

*Base and base mounting hardware is sold separately. Post spring type must be specified at time of order.

CHEVRON PANELS

Ideal for use in delineating sharp changes in road alignment and obstructions in or near roadway. Designed for use on concrete median barrier; intended for soil and pavement installations.

Product Specifications		
Dimensions	36" x 18" overall	60" x 18" overall
Post	28" White HDPE plastic sign post - 2.375" outer diameter	36" White HDPE plastic sign post - 2.375" outer diameter
Panel Material	White polyethylene plastic	
Reflective Sheeting	High intensity, type IV reflective sheeting with black ink - <i>diamond grade also available</i>	
Spring Type	Fixed or Drivable spring types available*	
Compatible Bases	Surface Mount Fixed or Drivable bases*	
Directional Panel	Left or Right	

*Base and base mounting hardware is sold separately. Post spring type must be specified at time of order.
